Notes:				
<ol style="list-style-type: none"> 1. Installer downloads include a full install (setup) package. Zip images include only the daemon files necessary to run FlexNet 3. RHEL Linux is supported on HP Intel and Sun AMD platforms. 4. For the official PTC install guides please visit the PTC Reference Documents page. 5. PTC recommends that customers on Windows XP move to Windows 7 or Windows 8/8.1 as soon as possible to ensure continued support. 6. Lmadmin shipped with 11.11.1 will report version 11.12.1 due to recent security fixes. 				

Deploying License Servers on Virtualized Environments

- While PTC does NOT certify the license servers on Virtualized Environments, the license servers can be deployed on a Virtualized Environment supported by Flexera. In such cases, PTC support will be limited to issues which can be reproduced on a non-virtualized desktop/server.
- List of Virtualized Environments supported by Flexera can be found [here](#).
- Licenser Servers should be deployed in a manner consistent with PTC's [Licensing Basis](#).
